

Registration

Purpose:

To ensure that the design of pressure retaining components and piping are reviewed by an independent third party

Registrars:

- The designated registrars are the Authorized Inspection Agencies (typically, the Canadian Provincial Jurisdictional Authorities)

Registration

Designs requiring registration:

- Systems and Components (including containment components), except as exempted by the CSA Standards
- Components and fittings in a registered system, except as exempted by the CSA Standards
- Repairs and Replacements to in-service systems do not require registration
